Jaynes-Cummings: spectrum
Jaynes-Cummings: inversion, collapse and revival
coherent states (Fock amplitudes)
displaced squeezed states (Fock amplitudes)
Wigner functions: Fock, cat and squeezed states
driven atom-cavity: Lindblad evolution
driven atom-cavity: steady state
transverse-field Ising chain (N = 12): lowest 6 levels
transverse-field Ising chain: half-chain entanglement entropy
XXZ chain (N = 12): lowest 6 levels
FLRW: comoving distance (3 universes, z = 0.01-10)
FLRW: luminosity distance, with curvature
FLRW: age at a = 0.1-1
dopri5 vs RK45: 2000 fixed Dormand-Prince steps (Lorenz)
dopri5 (rtol 1e-12) vs DOP853: Kepler orbit, e = 0.6
dopri5 (rtol 1e-12): return to perihelion after one period
